Internship: Data Analyst / Software Developer (w/m/d)

plane ground airport consulting is an international rewarded strategic consultancy for airport planning and design. We are looking for an intern (w/m/d) as data analyst or software developer for at least 6 months with up to 20 hours / week for our office in Cologne.

Your contribution to our various studies and projects will include amongst others the following:

- Develop software to support our airport projects, from one-off scripts to complete applications.
- Collect, clean and prepare both structured and unstructured datasets.
- Data analysis to identify trends and correlations, including geographical and time series data.
- Prepare dashboards to visualize and communicate insights from data.

Your qualifications:

- Currently studying computer science, software engineering, data science or similar.
- Strong programming skills in programming languages like python, javascript or C#.
- Familiarity with source control systems, SQL databases and GIS systems.
- Familiarity with dashboard software, such as Power BI or Tableau.
- Ability to work independently and in a team environment.
- Strong communication skills and high motivation.
- Ideally initial work experience in a corporate or scientific environment.

What you can expect:

- Exciting international projects in the airport planning and consultancy world-
- Flexible working hours with home-office option-
- Prospect for self-development in a small but highly motivated team-

Detailed applications and any questions regarding the application should be directed to Mr. Soares Roque at info@plane ground.com.
